The Center *for* *the* History of Medicine

*Enabling the history of medicine and
public health to inform healthcare, the
health sciences, and the societies in
which they are embedded*

One of the world's leading resources for the study of the history of health and medicine, the Center for the History of Medicine in the Countway Library attracts a global audience of researchers to its integrated collections of rare books, journals, archives, manuscripts, artifact collections, and visual, sound, and moving image works. Our public programs, exhibits, initiatives, and content curation activities are directed to a diverse audience of health professionals, students, academic researchers, and the general public and derive strength of purpose from the Harvard Medical School, Harvard School of Dental Medicine, Harvard T. H. Chan School of Public Health, Boston Medical Library, and Longwood Medical and Academic communities.

Visit our online digital collections site, [OnView](https://collections.countway.harvard.edu/onview) (collections.countway.harvard.edu/onview), to browsedigital exhibits, documents, photographs, museum objects, and more.

Visit our [blog](https://countway.harvard.edu/news) (https://countway.harvard.edu/news) to learn about collections, events, and initiatives.
